Sun Safety:

- Keep babies younger than 6 months out of direct sunlight. Find shade under a tree, an umbrella, or the stroller canopy.
- When possible, dress yourself and your children in cool, comfortable clothing that covers the body, such as lightweight cotton pants, long-sleeved shirts, and hats.
- Limit your sun exposure between 10:00 am and 4:00 pm when UV rays are strongest.
- Wear sunglasses with at least 99% UV protection. Look for youth-sized sunglasses with UV protection for your child.
- Use sunscreen!!!!

Sunscreen:

- Broad spectrum, which protects against UVA and UVB sun rays.
- Water-resistant sunscreens can no longer be labeled as “waterproof.” Sunscreens are now labeled as water resistant for up to 40 to 80 minutes.
- Sun Protection Factor (SPF) of 30 or higher.

How to Apply Sunscreen:

- Apply to all exposed skin at least 30 minutes before going outside.
- Reapply every 2 hours and after water exposure, such as swimming or sweating.
- Reapply the sunscreen when outdoors in both sunny and cloudy weather. Sun rays still come through the clouds and can still affect the skin.
- Check the expiration date of the sunscreen. If the sunscreen has changed in color or consistency, you should throw it away and get new sunscreen.
